NEWS LETTER

Reporting For Term II & Bot Exams

Students reported back for Term II and settled into classes as the new academic term began. During this period, learners received timetables and were oriented on term expectations to ensure a smooth start.

Soon after reporting, the school conducted Beginning of Term (BOT) examinations to assess learners' understanding from the previous term. The results helped teachers identify learning gaps and plan appropriate support to improve performance throughout the term.

ACADEMIC GIANTS LUNCH AT KFC

The school rewarded top-performing students through a special lunch outing at KFC, celebrating their academic excellence. In addition to the outing, high achievers were also given special lunch at school as part of continued appreciation for their performance

The recognition was further highlighted during a public ceremony at the school assembly, where outstanding students were acknowledged in front of the school community. This initiative motivated learners to work harder and strive for excellence while enjoying a relaxed and rewarding experience with peers and teachers

Environmental Day

It was marked with a series of activities aimed at promoting environmental conservation and awareness. This day is celebrated worldwide on **June 5th** as World Environment Day. Students actively participated in cleaning exercises, tree planting, and sensitization campaigns on proper waste management. During the activities, learners planted trees around the school compound and were guided on the importance of protecting the environment.

They also learned about sustainability, the role of trees in improving air quality, and the need to maintain a clean and green environment. These activities encouraged responsibility, teamwork, and a deeper appreciation of nature among students, helping to build a more environmentally conscious school community.

Ebola Awareness

The school has taken the following steps

- Set up hand washing stations across the school premises
- Conducted health talks in all classrooms
- Educated students on proper hygiene practices
- Encouraged students to report any illness to teachers immediately

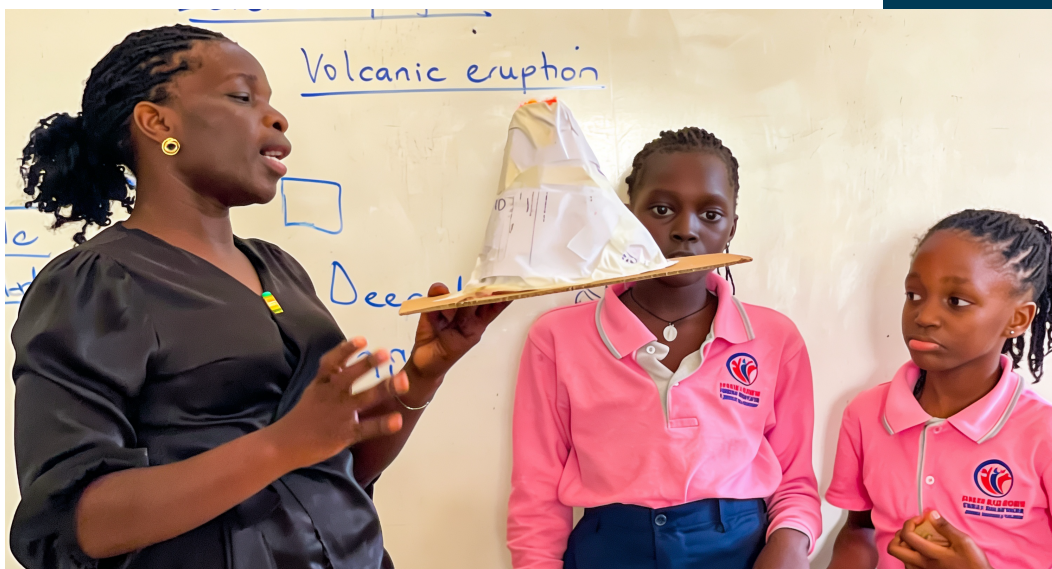

Parents are urged to monitor their children's health and report any concerns to the school promptly.

Together, we can keep our school community safe and healthy.

Science Experiments

Students actively participated in science experiments that brought classroom learning to life. Through hands-on activities, learners explored scientific concepts, made observations, and drew conclusions based on their findings.

These practical sessions enhanced understanding, encouraged curiosity, and helped develop important skills such as critical thinking, teamwork, and problem-solving. The experiments made learning more engaging and meaningful for students.

Learning Beyond The Classroom: Educational Trips Recap

Our students recently enjoyed fun-filled educational trips that brought learning to life in the most exciting way! Our nursery children visited the zoo, where they came face to face with a variety of animals, sparking curiosity and wonder. It was a day full of giggles, wide eyes, and unforgettable memories for our little ones. Upper primary students headed out to the farm, where they got hands-on experience with crops, livestock, and agricultural practices – bringing their science and social studies lessons to life in a very real way. We thank our parents for their support and our teachers for making both trips safe, organised, and truly memorable.

Nursery Trip

The nursery pupils enjoyed an exciting trip to the Wildlife Education Centre, where they learned about different animals and the importance of conservation. They later visited Akamwesi Mall Fun Park, where they had fun playing and interacting with their classmates. The trip combined learning and enjoyment, making it a memorable experience for the children.

Upper Primary Trip

Our primary students had a fantastic visit to the NARO Educational Farm, where they got an up-close look at both plant and animal life. Students explored a variety of crops, learning how they are planted, grown, and harvested, while also interacting with farm animals and discovering how they are cared for. The visit brought classroom lessons in science and agriculture to life in the most exciting way.

The fun didn't end there! Students then headed to the water park, where they enjoyed thrilling water activities and indoor games, making for a perfect end to a well-rounded day of learning and adventure.

Students returned to school inspired, refreshed, and full of wonderful memories.

Painting Day

The Top Class pupils took part in a joyful Painting Day under the theme "Little Hands, Big Family."

The young learners used colours to express their understanding of love, unity, and family, creating bright and meaningful artwork.

The activity allowed children to explore their creativity while developing fine motor skills and confidence, creating a warm and engaging environment where pupils shared ideas and enjoyed learning together.

The excitement was made even more special as parents joined in, bonding with their children over painting and fun-filled games. It was a beautiful day of laughter, togetherness, and shared memories that reminded us all of the joy of learning and playing as a family.

Painting Day was a wonderful experience that highlighted how even little hands – and the big hands that guide them can create big and beautiful ideas.
